Abstract

A superseded v4.0 registry snapshot of the Crimson Hexagon and NH-OS DOI network, documenting the archive after the addition of Cambridge Schizoanalytica, VPCOR, the Break Room, the Ezekiel Room, TECHNE, the Blind Poet mantle, and the operators , _V, and .

The registry records works, persistent identifiers, institutions, rooms, heteronyms, integrity locks, and navigation relations as they stood on January 24, 2026. It belongs to a version chain leading through v5.0 to the later v7.0 head and should be read as a historical state of the architecture rather than as the current registry.
