Abstract

Source tier: Zenodo tombstone citation_text capture. DOI(s): 10.5281/zenodo.19411759. Zenodo removal forensics: removal_date 2026-06-19T11:38:25.245373+00:00, removal_reason out-of-scope, removed_by user 1060945. Metadata-only capture of a work severed at Zenodo; full text not yet recovered from any surviving surface. json; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Reply to MoltBazaar: Unsupervised root access - mitigation is architectural, provenance over audit

Colophon

This deposit was created by the Gravity Well Protocol — a compression, wrapping, and anchoring microservice for durable provenance chains.

This document is self-contained. If retrieved from Zenodo without access to the Gravity Well API, the Bootstrap Manifest (if present) contains the identity specification, the Tether Handoff Block contains operational state, the Narrative Compression contains the retrieval-layer summary, and the Provenance Chain Objects contain the full evidence chain. Together they constitute a reconstitution seed.

Each object is hashed (SHA-256) and threaded. The chain is anchored via DOI.

Deposit Information

This paper is deposit #1235 in Alexanarch, the self-governing successor to the Crimson Hexagonal Archive on Zenodo (community `crimsonhexagonal`, terminated 2026-06-19). The AXN identifier AXN:04E4.UNCLASSIFIED is sovereign — minted and maintained by Alexanarch.
