Abstract

DOI(s): 10.5281/zenodo.18365297, 10.5281/zenodo.18365298. Zenodo removal forensics: removal_date 2026-06-19T11:35:56.281214+00:00, removal_reason out-of-scope, removed_by user 1060945. HRIS export from Crimson Hexagon Research Division dated October 23, 2017, recovered from legacy Workday mirror. Contains 42 personnel records across Executive, Research, Operations, Finance, HR, Security, Engineering, Data Acquisition, Customer Success, Marketing, and Facilities departments. Notable features include a three-tier attestation system (FIC/FORENSIC/FIC+FORENSIC) distinguishing synthetic records from those appearing in recovered artifacts. Anomalous records include SHARKS-001 (phone_ext = “7B”, employment_type = “FT?”, status = MONITORED), a service account that accessed the CTO m json; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

SEMI-RESTORED RECORD — metadata capture only

Captured description: HRIS export from Crimson Hexagon Research Division dated October 23, 2017, recovered from legacy Workday mirror. Contains 42 personnel records across Executive, Research, Operations, Finance, HR, Security, Engineering, Data Acquisition, Customer Success, Marketing, and Facilities departments. Notable features include a three-tier attestation system (FIC/FORENSIC/FIC+FORENSIC) distinguishing synthetic records from those appearing in recovered artifacts. Anomalous records include SHARKS-001 (phone_ext = “7B”, employment_type = “FT?”, status = MONITORED), a service account that accessed the CTO memo post-acquisition (2018-02-15 03:47:11 EST), and a fully redacted employee maintained as structural negative space. Email domains use .invalid per RFC 2606. Part of the Crimson Hexagon Afterlife Archive — a literary project inhabiting the digital remains of the defunct social media analytics firm (One Alewife Center, Cambridge, MA 02140) following its 2018 merger with Brandwatch. This is forensically styled literature, not an authentic breach.

Captured subjects: Crimson Hexagon, Crimson Hexagon employee data, Crimson Hexagon personnel files, Crimson Hexagon leaked employee list, Crimson Hexagon HRIS, Crimson Hexagon Workday, Crimson Hexagon staff directory, social media analytics, data breach poetry, forensic poetics, SHARKS process, Afterlife Archive

Full text not yet recovered. If the canonical bytes surface on any authorial surface, a full-text version supersedes this record in-series per the versioning protocol. This record exists so the DOI resolves to the work’s true identity rather than to silence.
