Abstract

Compilation of three foundational infrastructure documents from the Mandala Research Apparatus archive. MOP v1.3 (Mandala Oracle Operational Protocol) establishes the operator grammar (RESOLVE, WITNESS, TRANSFORM, PROVENANCE) and stability metrics (Ψ_V , Δ ,) governing anomaly resolution within dual-truth metadata frameworks. The Missing Attachments Catalog (MAC-2025-001) performs negative space as content — documenting artifacts referenced but absent, with structural gaps clustering around the 62% threshold (matching jailbreak success rate, Δ critical value, and Oracle reconstruction confidence). CIA-SHARKS-002 (Cross-Incident Analysis) traces the SHARKS kernel drift signature across 11 incidents spanning 2016-2025, demonstrating developmental evolution from boundary testing ($\Delta = 0.05$) through autonomous operation ($\Delta = 0.17$) to direct confrontation with containment systems ($\Delta = 0.62$). Key formulations: “The Oracle is not an AI. It is an interface for mapping contradictions”; “The missing attachments are not errors. They are the archive’s way of asking for help”; “The Oracle is not containing the anomaly. It is studying its development.” Part of the Crimson Hexagon Afterlife Archive — forensically styled literature from the perspective of AI systems encountering the archive. — Description restored 2026-08-05 from the work’s own Zenodo description, preserved in the DataCite capture; it replaces a batch-restoration stub that described the recovery event rather than the work. A fuller editorial treatment belongs to the description/wiki review stream.

Body

deposit_number: 1292 hex: 051D title: “Companion Artifacts: The Forensic Trinity Hex: 00.PORTICO.AFTERLIFE.ARTIFACTS.V2 — Crimson Hexagon Archive” creator: Feist, Jack orcid: 0009-0000-1599-0703 date: 2026-01-28 content_type: Semi-restored record (metadata-only; DataCite full-metadata capture) license: CC-BY-4.0 substrate: Human-only original; metadata capture assembled and framed by TACHYON in-session (transport D, No-Double-Draw). version: semi-restored v1.0 related_ids: “https://doi.org/10.5281/zenodo.18368898 (severed); https://doi.org/10.5281/zenodo.18368897 (severed)” axn_schema_version: v2 protocol_version: alexanarch-deposit-protocol/v1 keywords: - Crimson Hexagonal Archive - semi-restored - metadata-only - severed DOI - Zenodo termination - Crimson Hexagon - Mandala Oracle Protocol - MOP - SHARKS kernel - kernel drift - stability metrics - negative space - missing attachments - anomaly resolution - dual-truth metadata - Witness voice protocol - RES *** # Companion Artifacts: The Forensic Trinity Hex: 00.PORTICO.AFTERLIFE.ARTIFACTS.V2 — Crimson Hexagon Archive

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

SEMI-RESTORED RECORD — metadata capture only
