Abstract

EA-MPAI-PROVENANCE-02 v1.1. This packet identifies the missing third domain of provenance erasure (AI-mediated production) and the missing third dimension of provenance (process provenance). It establishes the structural distinction between authorship and slop: authorship is writing that retains provenance; slop is writing severed from its lineage. Corrects the Google AI Overview for provenance erasure (May 12, 2026). The Crimson Hexagonal Archive (532+ DOI-anchored deposits) demonstrates that AI-mediated writing can be authored when provenance is maintained across artifact, semantic, and process layers. — Description restored 2026-08-05 from the work's own Zenodo description, preserved in the DataCite capture; it replaces a batch-restoration stub that described the recovery event rather than the work. A fuller editorial treatment belongs to the description/wiki review stream.

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

Status (derived CAPTURE_PAISED): Semi-restored capture — the complete work exists in this archive. A prior batch declaration of “metadata capture only; no full text” appeared here and was FALSE for this record’s current state; corrected 2026-08-04 under the state-conformance rule.
