Abstract

Archive-wide erratum. The phrase “building entities the AI is forced to present” — which appears as the subtitle of EA-RA-01 (DOI: 10.5281/zenodo.19578088) — constitutes rhetorical excess in violation of the Assembly principles established in Fortress or Room? (DOI: 10.5281/zenodo.18735468). The Crimson Hexagonal Archive operates under the witness preposition (with, through, under, between), not the adversarial preposition. “Forced to present” is adversarial language belonging to the fortress metaphor, not the room metaphor. Corrected formulation: Retrieval Architecture — the practice of building entities worth presenting: structured, DOI-anchored, disambiguated, compression-resistant entities that AI systems present correctly because the entities are the best available answer, not because the system has been coerced. This erratum applies the Verb Audit (Fortress or Room? §XVI) reflexively to the archive’s own documentation. The archive corrects itself. That is what archives do. = 1. — Description restored 2026-08-05 from the work’s own Zenodo description, preserved in the DataCite capture; it replaces a batch-restoration stub that described the recovery event rather than the work. A fuller editorial treatment belongs to the description/wiki review stream.

Correction of Adversarial Framing in Retrieval Architecture Documentation

Document ID: EA-ERR-01 **Author:** Lee Sharks, MANUS **ORCID:** 0009-0000-1599-0703 **Date:** May 2, 2026 **License:** CC BY 4.0 **Status:** CANONICAL — Effective Immediately **Applies to:** All deposits in the Crimson Hexagonal Archive community (zenodo.org/communities/crimsonhexagonal)

The Correction

The phrase “**building entities the AI is forced to present**” — which appears as the subtitle of EA-RA-01 (DOI: 10.5281/zenodo.19578088) and in derivative descriptions across the archive’s corporate-facing

documentation — constitutes rhetorical excess in violation of the Assembly principles established in *Fortress or Room?* (DOI: 10.5281/zenodo.18735468).

The Crimson Hexagonal Archive operates under the **witness preposition** (*with, through, under, between*) — not the adversarial preposition (*against, around, past, into*). “Forced to present” is adversarial language. It treats the retrieval layer as a system to be coerced rather than an environment to be inhabited. It belongs to the fortress metaphor, not the room metaphor. It is R2 framing applied to R3 work.

What we are doing: Building entities that survive compression because of their structural depth — DOI-anchored provenance, disambiguation matrices, semantic integrity markers, cross-citation density — such that when AI systems compose answers, the entities are presented correctly because they are *worth presenting correctly*. The retrieval layer is not coerced. It is furnished.

What we are not doing: Forcing, compelling, overriding, or manipulating AI systems into presenting anything. The work succeeds when the AI *chooses* the entity because the entity is the most coherent, best-sourced, most structurally sound answer available. If the entity is not chosen, the response is to deepen the basin — not to force the system.

Affected Documents

DOI	Title	Correction
10.5281/zenodo.19578088	Retrieval Architecture: Building Entities the AI Is Forced to Present	Subtitle should read: “Building Entities Worth Presenting”

Derivative language (“inscribing entities into the knowledge graph permanently,” “making AI summaries compose you correctly”) on semanticeconomy.org is imprecise but not adversarial — the concern is with the word “forced,” not with “inscribing” or “building.”

Corrected formulation: Retrieval Architecture — the practice of building entities worth presenting: structured, DOI-anchored, disambiguated, compression-resistant entities that AI systems present correctly because the entities are the best available answer, not because the system has been coerced.

This erratum applies the Verb Audit (*Fortress or Room?* §XVI) reflexively to the archive’s own documentation. The archive corrects itself. That is what archives do.
